

Subject: Financial Markets and Institutions

By Dr. Priyanka Dukhande

CASE STUDY

These days, the development of a country is judged by its system of transferring finance from the sector where it is in surplus to the sector where it is needed the most. To give strength to the economy, SEBI is undertaking measures to develop the capital market. In addition to this, there is another market in which unsecured and short-term debt instruments are actively traded every day. These markets together help the savers and investors in directing the available funds into their most productive investment opportunity.

1. Name the function being performed by the market in the above case. CO 5
2. Name the market segment other than the capital market segment in which CO 5 unsecured and short-term debt instruments are traded. Also, give any three points of difference between the two
3. Explain in detail (any three) instruments of the same. CO 6

Peer Review and Critique Comment

Subject -Financial Markets and Institutions (Semester III- Finance)

Review –

The case study seems to good and interesting having financial markets applications

Few suggestive recommendation is as follows,

- Subject Faculty should use the BT level verbs

Dr. Kavita Chakravarty

(Assistant Professor and Finance Faculty)

3. Explain in detail (any three) instruments of the same. CO 6

1. Name and assess the function being performed by the market in the above case. CO 5
2. Evaluate the market segment other than the capital market segment in which CO 5 unsecured and short-term debt instruments are traded. Also, give any three points of difference between the two
3. Explain in detail (any three) instruments of the same. Formulate the strategy for short term investment. CO 6
