Placement Cell

I am pleased to convey that a batch of highly talented young men and women is ready to take up challenging responsibilities of the corporate world. Our final placement process, to be scheduled in October 2019, provides an opportunity to hire our graduating students full-time. You can also meet our graduating students who have prior work experience through our internship placement process.

Our MMS & PGDM admission process is quite rigorous and highly competitive. Our curriculum requires these highly motivated and bright students to undergo mandatory courses in the first year. Once they successfully complete the first year, they undergo an internship to learn from corporate life. After completing their internships, these students are allowed to choose a variety of electives in their second year. Many students choose electives to pursue their industry-specific and/ or disciplinary interests. Besides academics, students also learn from their vibrant community life on campus. They manage and take part in a number of co-curricular and extracurricular activities which provides them opportunities to grow beyond classrooms.

Over the last few years we have taken several initiatives to enhance the global flavour of our students by arranging International Immersion Programs in Dubai, Thailand, South Africa, Singapore etc. These initiatives convey our commitment to help our students develop global mind-set and be better prepared for a globalized world of business.

I invite you to have a look at the profile of our second year students. I would also like to take this opportunity to thank you for the invaluable support you have extended to us over the years.

Hello everyone, I have completed my MMS studies in Marketing Management.

Our college has amazing faculty and good placements. Placements : Here one will get good opportunities in an internship as well as placements. Students are placed in accordance with their skill. Many good and reputed companies visit our college for placements as well as college provides a good internship in reputed companies.

Infrastructure : Facilities available here include labs, classrooms, library, air-conditioners, etc. The quality of the food available in the canteen is also good. I started my career in the pharma industry because I have learnt the basics of marketing in an internship in AVA Chemical then got placed in a reputed pharma company. My Starting profile was sales in Lupin Pharmaceutical as Medical Representative then I worked hard on brand development area therefore I had upgraded myself by getting promoted in Product Management Team in **Anglo French Drug and Industries** which is a well known 96 year old nutraceutical organisation. At present I'm working as **Product Manager**, hence confidence level has boosted up to achieve my next goal.
